Field work on Cultivation of Medicinal Plants

Theme: To create awareness on Cultivation techniques.

Dates: 3rd February, 2019

Location: Kadiyam

Organized by: Viswanadha Institute of Pharmaceutical Sciences

Herbal garden reflects the long-standing tradition of conserving and using plants and plant products for health care and cooking. 80% of the world's people use herbs as their main form of medical treatment (WHO). There is an increasing demand for medicinal plants. Herbal plants (herbs, shrubs, vines, climbers, trees) are known for their healing and/or taste properties. As a part of the subject “**Pharmacognosy and Phytochemistry**” students were taken to **Kadiyam** to visit “**Sri Venkateswara Nursery**” to create awareness regarding various techniques of cultivation and processing medicinal plants. 41 students of II B.Pharmacy II Semester have participated along with two faculty members D. Aruna Kumari and K.Pushpa Rama Lakshmi of Viswanadha Institute of Pharmaceutical Sciences.
